-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

1. This office action is in response to communication filed on 5/12/2005.
2. Claims 1-21 are presented for examination.

**Claim Rejections - 35 USC § 102**

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Gruse et al. (6,389,538 hereinafter Gruse).

With respect to claims 1-2, 11-12, 21, Gruse discloses a content usage-fee management system for performing transaction processing of content which is usable by a user device (col. 11, lines 49-64; col. 13, lines 5-9, Figure 6), said content usage fee management system comprising a service provider for managing a service for the provision of the content, wherein said service provider receives a usage log from said user device, said usage log being created by said user device and including log information containing data of a content usage fee (col. 47, lines 49-55; col. 13, line 45 to col. 14, lines 1-9), and said service provider compares the content usage fee with a predetermined threshold value as to determine the use of the content that is allowed (col. 23, lines 19-38).

With respect to claims 3, 5, 13 and 15, Gruse further teaches said service provider requests a clearing center which manages an electronic money balance of said user device to inquire about the electronic money balance usable by said user device (col. 48, lines 1-43; col. 49, lines 31-31).

With respect to claims 4 and 14, Gruse further teaches that the content is sent to a user device in the form of a secure container including the content encrypted with a content key, and said service provider sends the content key to said user device only when it is determined that the use of the content is allowed by comparing the content usage fee contained in said usage log with the predetermined threshold value (col. 9, lines 58-67; col. 10, lines 4-17; col. 12, lines 43-54; col. 15, lines 30-35; col. 16, lines 42-55; col. 17, lines 12-20).

With respect to claims 6, 16, Gruse further teaches wherein said service provider creates a receive log including the usage fee data based on said usage log received from said user device, and sends said receive log to a clearing center which manages an electronic money balance (col. 47, lines 49-67; col. 48, lines 1-43).

With respect to claims 7 and 17, Gruse further teaches that the threshold data is checked when said usage log is created, and, when the usage fee is found to exceed the threshold data, said user device adds identification data indicating that the usage

Art Unit: 3622

fee exceeds the threshold data to said usage log (col. 47, lines 49-55; col. 13, lines 45 to col. 14, line 9; col. 21, lines 46-51; col. 23, lines 19-38).

Claim 8 is rejected under same rationale as claims 6 and 16 rejected above.

Claim 18 is rejected under similar rationale as claims 6 and 16.

With respect to claims 9-10, 19-20, that the usage log is sent from the user device to said service provider, mutual authentication processing is performed between said user device and said service provider, and said user device attaches a digital signature to said usage log, and upon receiving said usage log, said service provider verifies the integrity of the digital signature (col. 9, lines 58-67; col. 10, lines 4-17; col. 12, lines 43-54; col. 15, lines 30-35; col. 16, lines 42-55; col. 17, lines 12-20).

### **Response to Arguments**

4. The drawings received on 5/12/2005, do not contain any red markings showing proposed changes thereto.

5. The objection to the specification and to the claims have been withdrawn.

6. The 101 rejection has been withdrawn.

7. With respect to managing a service provider for managing a service for the provision of the content comprising receiving means for receiving a usage log from the user device, the usage log being created by the user device and including log information containing data of a content usage fee and determining means for determining whether the use of the content is allowed by comparing the content usage

fee with a predetermined threshold value. Applicant admits on page 2, last paragraph and the beginning of page 3 of the response to arguments that in Gruse the clearinghouses 105 perform the above mentioned function of the claims but argues that in the claims, a service provider is the one performing those functions. The Examiner wants to point out that in Gruse, the clearinghouses 105 is equivalent to the service provider of the claims because clearinghouses 105 is performing the same functions as the service provider of claimed invention.

**Conclusion**

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
